

LE10 Quick Start Notes

1. **Fully charge battery** upon receiving LE10 Body Camera
2. Insert provided Micro SD Card into camera (**Item 9** on **Figure 1.** below)
3. Turn the **POWER** switch on (**Item 5** on **Figure 1.** below)
4. Front LCD Displays:
 - a. Camera Icon
 - b. 1080P Recording
 - c. Battery Icon
 - d. Remaining Record Time
5. Snap the LE10 body camera into the enclosed Camera Body Clip Mount

6. Place on uniform or in “Heads-up Mic & Camera Holder”, the LE10 body camera has a 120 degree field of view, left to right, up and down
7. To **START** recording; simply push the record button (Green) (**Item 2** on **Figure 1.** below) on top of the body camera
8. To **STOP** recording push the button (Green) (**Item 2** on **Figure 1.** below) on top of the body camera again

NOTES:

-) You must press the record button (Green) to stop recording
-) Do not press the “Still Picture” button (**Item 3** on **Figure 1.** Below) while doing a video. It will delete the video file
-) Do not turn the power off on the LE10 body camera before you stop recording. This can cause the last recording to be lost.
-) The battery life on **STANDBY** is approximately 4-5 hours. The body camera can be recharged via USB Car/Cellular charging ports – We set default standby to 2 minutes. To activate press (Green) button
-) Actual recording time will depend on video settings –
16GB X 1080 = 1 HOUR 20 MIN **16GB X 720 = 3 HOURS**
-) Typical videos will be 10 minutes in length
-) Date and Time have been preset – There is a video on www.forceprovideo.com if you need assistance on how to reset the date/time

-) The LE10 body camera may feel warm to the touch. This is normal with many small body cameras and is not an indication that the body camera is malfunctioning

9. To DOWNLOAD Video / Pictures

- a) Remove the Micro SD card from the bottom of LE10 body Camera
-) **Note:** If “red” security Tag is on the bottom of the body camera; plug LE10 into an USB port with the provided USB cable to your computer. **Skip steps b) and c)**
- b) Place the Micro SD card into the SD Adapter
- c) Insert the SD Adapter into the laptop/desktop slot
- d) If your computer is Windows based; Windows will automatically recognize your SD card. Simply follow the screen commands
- e) Save the videos to your computer and attach the files to your police report
-) **Note:** Each body camera should have its own directory on the computer
-) Example: `\Smith\123456` – Office Name and Serial # of the Body Camera
- f) **Note:** If the Original SD card will be replaced with a new Micro SD card because of evidence; it should be stored in the supplied Anti-Static Evidence Bag and securely put in your evidence room or insert back in the bottom slot to continue use

Figure 1.

Note: The LE10 body camera has built in Wi-Fi. You can use your Android phone to take pictures or videos.
